71, Fenchurch Street, E.C. 3.

17th December, 1921.

ENCLOSURES.

Dear Sir,

I have to acquaint you that in a letter dated the 14th ultimo the Society's Surveyor at East London intimated that it is the intention of the Port Authorities to send the Hopper Dredger "AGNES" to Durban for general overhaul and the installation of new boilers.

You will observe that this vessel became due at the end of September last for 2nd Special Survey No.3, and I have to acquaint you that in the circumstances the Committee will authorise you to carry out this inspection.

For your information and guidance in dealing with the case, I send herewith particulars of the vessel's scantlings taken from the first entry report, together with drilling sheets and instructions for the carrying out of the survey, and I shall be glad if you will give the case the requisite attention.

I am, Dear Sir,
Yours faithfully,

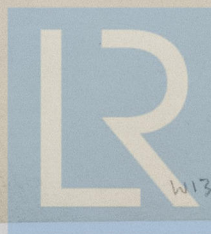

Secretary.

John Stewart Esq.,
PORT NATAL.

Hopper Dredger "AGNES".

P.S. - As regards the present boilers of this vessel, I may say that the annual survey was held at East London in July last, but in view of the condition in which they were found, it was recommended by the Surveyor that the boilers should be again examined before the end of January, 1922 and the vessel's class was allowed to remain subject to this being done. I may further say that the chain cables now on board which are not those reported upon when the 2nd Special Survey No.2 was held in 1919, require to be properly tested if this has not already been done.
