

12th September 1906.

This is to certify that the rivets used
in the construction of the hull of the
Japanese Steel Steam Ship "KAWASIMARU"
1154 tons Register of Tokio, Numbered No.
287) were of iron, and were tested from
time to time in accordance with the
requirements of the Society's Rules
and found satisfactory.

P. D. Ritchie
Surveyor to Lloyd's Register
Limited
