

S. S. "Westmoreland"

This is a new vessel recently built at Glasgow. It is alleged that the workmanship of the boilers was not good. The owners have had large repairs carried out to them. The builders maintain that very much more has been done than was necessary. In view of the serious cost of repairs and of heavy demurrage it is probable that litigation will ensue.

Mr Ruck Keene has joined the local Surveyors in examining the boilers & they have jointly made recommendations as to what in their opinion was necessary to be done.

All the repairs have now been completed & the boilers are reported to be in good condition. Some small repairs have been done to the engines.

It is submitted that the vessel is now eligible to have the records as assigned by the Glasgow Committee on 23<sup>rd</sup> May last. (See 1<sup>st</sup> Entry Report).
