Sirs,

ANS⁹.....

"WALMER CASTLE"

We are obliged for your letter of September.

Referring to the last paragraph, it is unlikely that the indentations to which you refer will be dealt with during the war unless more serious damage should be superimposed.

Concerning the propeller, the damage to this is relatively superficial in no way affects its reliability. It is desirable to continue this as a record against the ship?

Yours faithfully,

For THE UNION-CASTLE MAIL STEAMSHIP COMPANY LIMITED,
MWD,
