

GALVESTON

May 22nd, 1942.

Principal Surveyor,  
NEW YORK.

Dear Sir:

S/S "AMATLAN"  
Gal. Rpt. No. 4222

With reference to your letter of the  
19th instant quoting remarks received from Woking-  
ham relative to the above named report, we would  
reply as follows:

As the electric welded repair to the  
shell plate has continued efficient  
and sound for more than two years it  
is recommended that the special condi-  
tion regarding further examination may  
now be deleted.

Yours very truly,

*Wm. Rennie*
