

19 April 1917

Dear Sir
S.T. "Emanuel"

Your letter received this am.
I inspected the boiler of above vessel
and found there were a number
of screw stays to be renewed. The
act of the Combustion Chamber
requires cleaning to ascertain how
many will have to be renewed. The
machinery ought now be opened out
till the boiler repairs are being
effected if such could be arranged

I am Sir
Yours faithfully
J. J. Johnson
