Hull No 24 221

MON. NOV. 13. 1911

HULL.

LLOYDS REGISTER,  
LONDON.

3th September 1911.

RECEIVED 13 NOV 1911  
ANSP

that

the Steel Main Boiler made by Messrs Amos & Smith, Ltd Hull for the S.S. "PAOI", has been surveyed during construction by the undersigned. The material has been tested by the Surveyors to Lloyds Register; the scantlings are in accordance with the Societys Rules for a working pressure of 180 lbs per square inch, and the workmanship is good. The Boiler having been tested in our presence in the workshop, on the 27th July 1911 by hydraulic pressure to 30 lbs per square inch and again on August 23rd 1911 to 270 lbs per square inch whilst in its place on board, showed no signs of weakness, and was found tight and sound in every respect.
