(See Hamburg report No. 15323 herewith).

The Hamburg Surveyors write that the steamer "FUNDUS" was sunk and refloated, the necessary repairs being contracted the for under/survey of the Germanischer Lloyd. On verbal intimation being given to the Owner that the repairs would also require to be surveyed by the Society's Surveyors, he wrote a letter intimating he did not desire to retain the classes of the "FUNDUS" and of the other eight vessels given above.

The Surveyors add this is due to the difference in fees that would be charged by the Germanischer Lloyd for Surveys as compared with the Society's scale of fees.

It is submitted in the circumstances, there seems no alternative but to deal with the classes of these vessels as the surveys fall due.
