

La Loire
Hull Report No 21,22

Hull.

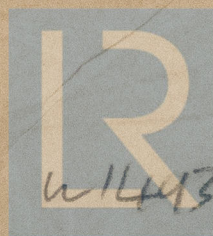

19th May 1909

Allison.B.Wilson.

Messrs Barle's Shipbuilding and Engineering Co., Ltd., survey the
Twin Screw Dredger "LA LOIRE" 604 tons, of London, during
construction at the above firms works with a view to the vessel
being classed 100A1 "DREDGER" in this Society's Register. The
Hull and machinery are practically completed with the exception
of the dredging plant, this plant will be fitted at Kenderijk,
Holland, to which port the vessel is about to proceed under her
own steam and attended by a tug.

I consider the vessel to be in good and efficient condition
and fit to make the voyage contemplated.

Allison B Wilson
