BENN HANN

GLS

No 64162

15th August, 1941.

Dear Sir,

With reference to Glasgow Report No.64162 on the Steamer "BEN HANN", it is concluded that in the Surveyor's opinion the aft part of the screwshaft in way of the oil gland should be examined before the end of February 1943 and that this can be done without drawing the shaft. I shall be glad if you will ascertain from the Surveyor and let me know whether this is so, and in this connection I would point out that under the present arrangements in force the Society would not require normally a complete examination of the shaft until February 1944.

I am, Dear Sir,  
Yours faithfully,
