

Shipbuilders: Messrs. Horsledge Iron Works

Yard No. S. 585

Tank

Engineers: Messrs. F. Braby & C² L^{TD} London ~~Engine No.~~

Fuel Service Tanks.

It is submitted that ~~the plan of~~ Messrs. Horsledge Iron Works be informed that, since it appears the construction ~~merit~~ approval for of this tank involves flanging of the plates, the provided tensile strength of the material should be between 26 and 30 tons/in² and it is suggested that the material be ordered to B.S.S. N^o 13, "Structural Steel for shipbuilding". Cold Flanging Quality.

Advise London Surveyors.
