

Windlass and Capstan proposed to be supplied by Messrs. Hyland Ltd., for the Rowhedge Ironworks Co's No. 585.

It is submitted the Sheffield Surveyors be informed that the Society have no regulations ^{respecting} ~~in respect of~~ the design or construction of capstans, and the only reference in the Rules to windlasses is set forth in Section 40, Para. 7. The responsibility, therefore, for the design of these items is a matter for the Makers and Builders, excepting that the Surveyors will require to satisfy themselves that the windlass is of suitable size for the cable.

The Surveyors might, however, attend the Makers' Works and test any castings in accordance with the Society's requirements and to issue a certificate.

The plans should be returned.
