*Is this a letter
re the 305 ton*

Dear Sir,

305 TON MOTOR TANKER FOR NATIONAL BENZOLE CO. LTD.

We have now secured the order for this vessel, and
enclose for submission blue prints in duplicate of each of
the following drawings:-

T.6886 "General Steelwork Arrangement"
T.6887 "Transverse Sections".

and we shall be glad to receive your approval of these plans
at your early convenience.

We would ask you to note that so far as the cargo
tanks are concerned, the scantlings shown are in accordance with
those shown on the Transverse Section, which we understand has

W151-0271(112)

already received your approval.

The details of the engine seating are in accordance with the requirements of the Atlas Diesel Co.Ltd. and machinery to be installed is their M.461 developing 560 B.H.P. at 375 r.p.m.

In order to produce a somewhat finer form of vessel, the Owners have agreed to increase the designed draft by 3", from 9'6" to 9'9", but the moulded depth to remain 10'9", and we assume that the summer freeboard assignment will permit of this increased draft.

We trust that the sheer indicated on the General Steelwork Arrangement and lengths and height of the erections will be sufficient to enable you to indicate to us the freeboard likely to be assigned.

Yours faithfully,
FOR THE ROWHEDGE IRONWORKS CO LTD

M. W. C.
MANAGING DIRECTOR
