Lloyd's Register of Shipping,

71, Fenchurch Street, E.C.

~~26th November, 1914.~~

4th December 1914

Dear Sir,

With reference to the classification in the Society's
H. Register Book of your steel screw ketches "LINARES" and
"LINDORES", I shall be obliged if you will kindly let me know
what arrangements you propose making for the Special Annual
Survey of the engines of these vessels, which became due at
the end of last month, to be carried out.

The following requires to be done in order to
comply with the Society's Rules, viz:- The cylinders, pistons
connecting rods, crank and other shafts, inlet and exhaust
valves and gear, clutches, reversing gear, propeller, sea
connections and pumps to be examined. The fuel tanks and
all connections are to be examined, and if deemed necessary
by the Surveyor to be tested to the same pressure as required
when new. If practicable, the engines should be tested under
working conditions.

I am, Dear Sir,

Yours faithfully,

Sydney Gerald Rhodes Esq.,

PERNAMBUCO,

Brazil.
