Ferro-Concrete Vessel "MOLLIETTE".

-----

Captain R.A.Gray, the Owner of this vessel, has called and states that after the removal of the engines last Spring the vessel was taken to the Blackwater, where she is now lying and is used as a houseboat, etc. In the circumstances he does not propose to submit her for further survey at present and quite understands that the class will lapse.

In the event of fresh circumstances arising Captain Gray might consider putting in new engines, when he would re-submit the vessel for classification.
