

Steam Trawler "OITO DE SETEMBRO". 211 tons gross.

Built - 1903 - 10 mo.

Owned by - Cia.Portuguesa da Pesca, Lisbon.

No surveys are due on this vessel, but on the occasion of the Special Survey No.1 being held in March and May 1920, it was recommended that the damage to the stem and stem plating sustained through collision, should be repaired on or before the end of September next.

This vessel has now been taken over by the Cia.Portuguesa da Pesca, who state in a letter addressed to the Acting Surveyor at Lisbon, that they do not desire to continue the classification of their trawlers as it does not bring them any special advantages, they being prohibited from selling them to foreigners, and they intend to insure the vessels themselves.

This case is submitted for the consideration of the Committee as to what action should be taken.
