

Urgent

c/s "Rays"

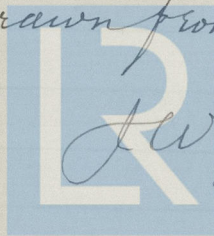

Phl. Rpt. No 9369.

It is submitted, that the Philadelphia Surveyors should be requested to state whether this vessel has been fitted for liquid fuel as no mention is made in their first entry reports, whilst in their launching report Phl. 1 they state that the vessel is to be fitted for liquid fuel.

If the boilers have been fitted for liquid fuel, they, the Surveyors, should state whether all the requirements of the Rules, section H 9, have been complied with.

In the meantime the note "Fitted for liquid fuel" should be withdrawn from the Register Book.
