

# COPY.

Copy of a letter received from the Society's Secretary, New York. Dated 29th September. Received 8th October, 1920.

Dear Sir,

I have your letter of the 8th instant giving a list of vessels owned by the Shipping Board on which the surveys of the Water Tube Boilers have become due, and am now in receipt of advice that the Steamer "FEDERAL BRIDGE" is now at New Orleans and the Shipping Board have telegraphed instructions to their Representative there to give the case the necessary attention.

The surveys on the other vessels will be attended to as they return to a home port.
