COPY FOR LONDON

NEW YORK

December 10, 1937

Foster Wheeler Corp.
165 Broadway
New York, N. Y.Bethlehem Shipbuilding Co. No. 4327
Texas Co. Tanker

Dear Sirs:

Your letter of the 3rd December was duly received
enclosing the following plans for approval:

NY 370-632 - General Arrangement
NY 370-636 - Lower Drum
NY 370-618 - Upper Drum

With regard thereto, I have to state that provided the material be made at approved works and tested in accordance with the Rules, and the boilers be built in accordance with the plan, to the Surveyor's satisfaction under the usual conditions of survey and testing set forth in the U.S. Government Bureau of Marine Inspection and Navigation Rules and Regulations for boilers having Fusion Welded Drums, the same will be approved for the intended working pressure of 450 lbs per sq. inch.

One copy of each plan has been signed and is returned herewith. I shall be obliged if you will forward two more copies for our system.

Please instruct Carteret to advise me when the material arrives in the shop.

Yours faithfully,

Senior Engineer Surveyor.
