The 1st Special Survey No. 1 became due in January last, and the Shanghai Surveyor intimated some time ago that the Owners did not intend to retain the steamer in class. Further enquiries were addressed to the Owners, and to the Surveyor at Hong Kong ; the latter now states that the matter has been carefully considered by the Directors who do not think any advantage would be gained by continuing the class.

The Classing Committee had the case before them on Friday, the 20th instant, when it was decided to withdraw the class from the Register Book and insert three dots ( . . . ) in lieu thereof, indicating withdrawal of class at Owners' request.
