

"ALLAN"

The attached letter has been received from the Helsingborg Surveyors.

IT IS SUBMITTED that, in reply, they should be informed that the following parts of the machinery were examined at Kiel in April, 1952, namely:-

Main engine cylinders, pistons, valves, top and bottom ends, Crank, thrust and intermediate shafts.

As the Owners propose to <sup>hold</sup> ~~have~~ the Special Survey, due 7,53, sometime in 1954, and, as the Machinery Record should be within twelve months of the date of the Hull Notation, it will not be possible to credit the above parts of the machinery as part of the Special Survey.
