RE M.V. "Dorsetshire"

R.B.—20,000—5/34.

Dear Mr Lyle,

The under deck tonnage of the above ship, as given on our copy of the Register, is 5016.60 Tons. With regard to the openings in the ships sides, I understand that these are still in existence, but that they are never now used and are kept permanently closed. They will be covered over on the inside by the wooden fittings in the troop decks.

Trusting that this is all the information you require,

Yours faithfully,

Geoffrey T. Adams
