MASON BUILDINGS, 13 MOSLEY STREET, NEWCASTLE/TYNE, I

Thursday 9th August, 1945.

Dear Sir,

"FORT ST. JOSEPH".

The acting Superintendents for this ship, Messrs. Buckland & Young, would be gratified if you could supply them, through us, with a report on the dry-docking of this ship at Baltimore in 1944, as they are anxious to know if the very distinct buckling between frames on the ship's bottom is due to having been in contact with the ground at some time or other.

Note:- the bottom is of welded construction.
