## SURVEY ON SHIP.

I, R. M. DE GRUYTER, Surveyor to Lloyds Agents, Certify that at the request of Captain C. Marques, Master of the S.S. "EGAMINONDAS C. EMBIRICOS" and Messrs. JOHN T. RENNIE & SONS, Lloyd's Agents at Lourenço Marques, I surveyed that vessel on the 20th day of December last, in consequence of her having the Chief Engineer reporting that the propeller was slack.

On examination of this vessel on the day named I found after she had been tipped, that the cement had broken away and that the nut had slackened back slightly. The propeller was driven tight by wedges, then the nut hammered up tight, the pin fitted, and then the nut cemented over.

From the survey that I have been able to make, as far as possible, I conscientiously believe the said vessel can proceed on her voyage and take dry and perishable cargo.

Dated at Lourenço Marques on the 24th December, 1913.

(Signed)
