

Shipbuilders: Messrs

Engineers: Messrs.

*James Laing
G. Clark*

Yard No. 721

Engine No. 1211

It is submitted that the plan of *boiler showing alterations to the arrangement of tubes* merits approval for *provided the work be carried out under the provided usual conditions of survey and testing.*

The Surveyors remarks regarding the plugs for the tube holes are noted and it is agreed it would be preferable to screw the plugs into the plate. If, however, it is desired to retain the method indicated on the plan this could be accepted provided the welding be carried out to the Surveyors satisfaction.
