

C7535.

GLASGOW

GLASGOW,

16th February, 1934

J. DAVEY and H. HAFNER,

S

Messrs. G. & J. Weir, Limited visit their works at Cathcart Glasgow on the 15th January, 1934 and subsequent dates for the purpose of examining and testing during construction One Auxiliary Air Compressor No.A.5766 built to the order of Messrs. Workman, Clark (1928) Ltd. and intended for their Contract No.532.

This Compressor is of the 2 stage type having cylinders 6" and 2½" diameter by 4½" stroke and a maximum compression of 300 lbs per square inch at 345 R.P.M.

The Compressor is tandem coupled to a single cylinder steam engine having a cylinder of 7½" diameter x 4½" stroke working at 100 lbs. per square inch.

The Compressor and steam engine have been built under special survey, the various parts having been tested as required by the Rules and on completion seen working under full load conditions on the test bed with satisfactory results.

The materials and workmanship are good and the various parts have been stamped for identification.

FEE: £4. 4. 0
