71, Fenchurch Street, E.C. 3.

28th February, 1938.

Dear Sir,

M.

With reference to your letter of the 24th instant respecting Messrs. Bremer Vulkan's Nos. 748/9/50, I have to state that the scantlings of the quadrant as shewn on the plan forwarded by you represent a standard of strength considerably below the requirements of Table 45 of the Rules. I shall therefore be glad if you will discuss the case with the Builders with a view to the necessary reinforcement being provided in the case of the quadrants which are already made, and modified arrangements being adopted for the remaining vessels. For your information and <sup>and guidance a</sup> copy of an approved plan similar to the one submitted is being sent under separate cover and I have also to refer you to the case of the "NUEVA GRANADA", the plans of which are in your Office.

The plan forwarded with your letter is also being returned under separate cover.

I am, Dear Sir,

Yours faithfully,

R.S. Johnson, Esq.,  
HAMBURG.
