Lloyd's Register of Shipping,

71, Fenchurch Street, E.C.3.

30th November, 1937.

Dear Sirs,

M.

I am in receipt of Mr. Holtz's letter of the 26th instant regarding Messrs. Bremer Vulkan's Nos. 748/9/50, and the contents have been noted.

In reply thereto I have to state that in examining the plan of stern frame for these vessels it appeared that the figure of 425 mm., representing the breadth of the casting at waterline 5, did not agree with the breadths given for the section at waterlines 4 and 6 immediately below and above. For this reason the figure was ringed round but not amended, and the figure of 525 mm., which appeared approximately to correspond to the figures immediately above and below, was indicated.

It is now seen that a dimension of 438 mm. has been provided at waterline 5. This figure satisfies the Society's requirements and will be approved.

I am, Dear Sirs,

Yours faithfully,

The Surveyors,  
BREMEN.
