

## Lloyd's Register of Shipping,

3, Wilhadistrasse,

Bremen, 26th November, 1936.

RECEIVED  
28 NOV 1936Assd. 28/11  
LONDON

Dear Sir,

Reference

M.

Having reference to the plan of Midship Section for Messrs. Bremer Vulkan's Yard Nos. 748-750 and the note:—"End connections of main girders and similar attachments to be welded by electrodes complying with para. 1-7", we discussed the different weldings with the Builders and informed them that the weldings of longitudinal girder ends to transverse bulkheads and vertical webs to transverse bulkheads should be made with para. 7 electrodes in the same manner as also done in their yard Nos. 718 and 727 in accordance with your letter M. of the 30th September 1935.

As the Builders now asked in a letter for your reconsideration and decision, we would feel much obliged for being informed what electrodes should be used for these web- and girder connections to the transverse bulkheads.

I am, Dear Sir,

Yours faithfully,

The Secretary,

LONDON.

London, England

8 NOV 1938

I Sir, Sir,

*P.S.*

Dear Sir,

These were and might connections to the standard  
for being informed what electrodes should be used for  
reconstruction and design, we would feel much obliged  
if the British now asked in a letter for you  
of the 20th September 1938.

Very Res. Sir and VSA in accordance with your letter N.  
electrodes in the same manner as also done in the  
to determine thickness and to make with bars.  
Sir and to determine thickness and velocity were  
British and informed that the weight of longitudinal  
I-2" we discussed the different methods with the  
ments to be welded by electrodes comparing with bars.  
note:—"Any connections of main girders and similar attach-  
for Messrs. Bremer Vulkan's Yard No. 42-430 and the  
Having reference to the plan of Member Section

Dear Sir,
