20th November, 1936.

Dear Sirs,

M.

I am in receipt of Mr. Carstensen's letter of the 17th instant regarding the frame spacing of Messrs. Bremer Vulkan's Yard Nos. 748/49/50, and the contents have been duly noted.

It is observed that the Builders specially desire to retain a frame spacing of 760 m/m to frame 164, and I have to state that this proposal will be approved, provided, as compensation, the thickness of the side and bottom shell plating in this area be increased 1 m/m.

I am, Dear Sirs,

Yours faithfully,

Secretary.

The Surveyors,

BREMEN.
