

A/B Gotaverken's Yard No.466 (M/S "LARVIKSFJORD").

IT IS SUBMITTED that the Surveyors should be asked to state the purpose for which the "accumulating tank" is fitted and whether this tank is separate from the daily fuel oil tank.

Further, if the "accumulating tank" is intended to act as an overflow tank it appears it would be difficult to make it of adequate capacity and accordingly it is suggested that the more usual arrangement of forming an overflow tank in a section of the double bottom should be adopted.

Plans of the oil fuel service tanks and piping should be submitted.

Retain plans.
