

s.s. "LA CARRIERE"

This vessel was built in 1938 - 8 by Messrs. Swan, Hunter & Wigham Richardson, Ltd., Wallsend-on-Tyne.

A letter has been received from the Owners stating that arrangements are being made to dry dock the vessel at New Orleans about the 13th proximo, and they desire to know whether the Committee would authorise the Mobile Surveyor to act solely on their behalf and to report such matters as may be considered to come within the category of Owners' requirements at the end of the guarantee period.

The above inspection would be in addition to the usual survey held by the New Orleans Surveyor for classification purposes.

The Writers desire to know what would be the appropriate remuneration for these special services.

It is submitted the Mobile Surveyor might be authorised to carry out the special services required by the Owners, and with regard to the fee it is suggested that £10-10-0 per day in addition to travelling expenses might be charged.

If this submission is agreed to the Owners should be requested to forward their instructions so that the Mobile Surveyor can be advised.
