

Messrs. Wm. Hamilton's Nos. 439-440-441-446-448

It is submitted the Builders be informed with reference to Mr. Ness's call at this office that the compensating rider plates, which are to be fitted to the upper and lower mounting angles of ^{the} hatch webs, ^{on the weather deck}, abaft the half length forward, should extend for 7'6" each side of the centre line. The Greenock Surveyors and the Freeboard Dept. should be advised.

Lt. Hamiltons 22.5.40
pc. Lt. 26-
pc. 4th Dept.

22nd May, 1940.
