

"MELISKERK"

It is submitted before this case receives the confirmation of the Committee, the Liverpool Surveyors be informed that this vessel was originally supplied with, and still requires, 300 fathoms of 2 6/16 chain cable and that at the last Special Survey this length and size was reported as then being on board. Their reporting of 270 fathoms under the Rule renewal size is consequently not understood and they should be requested to furnish their remarks and recommendations.
