ANSO / 6 act 10/7

Rotterdam, 11th of July, 1921.

M.

All communications to be addressed to
THE SURVEYORS.

The Secretary.

London.

Dear Sir :

With reference to my letter dated 7th instant regarding the steamer "CESARIO", I have enclosed herewith two photo prints, received from the Owners Messrs K.N. Stoom Maats Amsterdam shewing a proposal for deep tank arrangement in hold second abart engine room.

The new bulkhead fitted at frame No. 52 they propose without horizontal stiffener, but with the vertical stiffeners as shown, the original bulkhead will be fitted with a horizontal stiffener to leave the vertical stiffeners as originally placed.

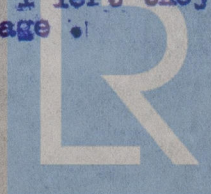

It is further proposed to fit two webframes to the ships side, and to leave pillars and girder on beams as originally fitted to save expens, your early reply will be very much appreciated, and a new plan will be sent for the London use as soon I shall have received it from the Owners.

I am Dear Sir.

Yours faithfully,

P. J. Deventer

P.S. With regard to the exempted space for tonnage I may state that the Owners wrote me that since I left they have noted that the space is already exempted from tonnage.
