

S.S. "D. A. D. G. 16"

Mr. Brewer, representing the Owners, has called and stated that this vessel is leaving Hull for Rotterdam, where it is the intention to fit a deep tank, and where the vessel will eventually probably load her first cargo.

Under these circumstances, it is probable that the sand ballast will be removed from above No. 7 tank, which will enable the tank to be examined internally, and also for the testing to be carried out.

It is submitted the Rotterdam Surveyors be informed accordingly, and enquiry should be made of the Hull Office so as to advise the Rotterdam Office of anything that remains to be done to complete the Survey.
