

Ex-German Steamer "MINNA HORN".

It is submitted that in the circumstances Messrs. C.W. Kellock & Co. might be informed that the bottom of this vessel was examined in dry dock in February, 1921, with a view to carrying out any repairs which might be necessary to satisfy the requirements of this Society for classification.

The vessel has, however, never been classed with this Society, and nothing further has been done with a view to her being classed.
