

EX-GERMAN STEAMER "MINNA HORN".

Upon inquiry, Major Pinkney states that the sale of this vessel has not been definitely completed. The bottom repairs, which are to be done under the supervision of the Society's Surveyors, have not been completed and are awaiting the arrival of a new stern frame. Messrs. Adams have applied to the Ministry for work to be commenced on the engines and boilers, but have been refused permission, although Dord Inchcape has given them permission to put in hand repairs to six plates above the water line. Otherwise, Messrs. Adams have been given no authority to commence any work whatever, and the sale is still subject to the bottom repairs being done to the satisfaction of the Society's Surveyors and a report being furnished to this effect.
