

S.S. "MINNA HORN".

Major Pinkney was informed (after speaking to Mr. Fowling), that either of the recommendations made by the Cardiff Surveyors relative to the stern frame of this vessel would be in order as regards classification, and he asked that a copy of the Cardiff Surveyors' Report might be sent along to him by hand this afternoon or a letter, embodying the recommendations, in order that an arrangement might be come to with the purchasers.

The original Report would, in the ordinary way be furnished to Mr. Garrett of the Chief Technical Adviser's Department at the Ministry of Shipping, who requested the survey.
