

Messrs. The Burntisland S.B. Co. Ltd.

Yard Nos. 231/2.

IT IS SUBMITTED the Leith Surveyors be informed it is noted that the Firm will arrange for the amendments shewn on the approved plan of general pumping arrangement to be complied with, and that an amended plan will be submitted.

With reference to the width of the bilge wells, it should be pointed out that in vessels of the type under consideration, it is common practice to fit wells at the wings only.

In the present case, no exception would be taken to the centre wells being extended as far as the side girder in the double bottom instead of ~~to~~ the commencement of the tank margin.

It should be added that whilst each case is dealt with on its own merits, the arrangements for vessels of this type should conform, as far as practicable, with the amended arrangements for the vessels now under consideration.
