deduct 7 feet

By whom built Harland

IngouanHarland & Wolff's No: 390 (Rotterdam)

It is stated by the Builders that the Owners wish to have two lengths of 120 fathoms of 5 inch steel wire supplied instead of the 150 fathoms of 7 inch steel steam wire required by the Rules, as they consider the latter very heavy and awkward to handle properly.

It is submitted that provided two lengths of 150 fathoms each of 5 inch steel wire be supplied, as suggested by the Surveyor, the proposal might be approved.

(The weight of 150 fathoms of 7 inch steel wire would be approximately the same as that of 300 fathoms of 5 inch steel wire)
