# Lloyd's Register of Shipping,

71, Fenchurch Street, E.C. 3.

14th August, 1933.

Dear Sirs,

I have to acquaint you that replace HP and LP turbine rotors for the s.s. "SEROOSKERK" and "ZUIDERKERK" are being constructed by Messrs. British Thomson Houston Co., Ltd., Rugby,

It is understood that when the new rotors are installed the total shaft horse power of each vessel will be 5000, as against the present output of 4000 SHP.

In the circumstances, in order that the suitability of the existing straight shafting may be considered, I shall be glad if you will forward particulars of any other modifications that will be effected, especially in regard to the diameter and revolutions per minute of the propeller.

I am, Dear Sirs,

Yours faithfully,

Secretary.

The Surveyors,

ROTTERDAM.
