

S.S. "ZUIDERKERK".

A plan showing proposed arrangements at the bow has been approved in the Rotterdam Office, and a copy forwarded here for record.

The scantlings and arrangements have been examined generally, and appear to be in order.

The Surveyors should be informed that having regard to the fact that this is an existing vessel and there will be no sensible increase in the displacement of the vessel due to the increased length, no alteration need be made to the equipment.

They should be informed, however, that to comply with Section 17 of the Rules, for the increased length, 8 watertight bulkheads should be fitted, and as only 7 complete watertight bulkheads are provided it will be necessary for the record in the Register Book regarding the bulkheads to be amended to :-

"Intermediate BH dispensed with; 3 BH to Sh.Dk; 4 BH to U.Dk."
