

M. V. "SILVERAY"

Electric Cables Insulated with Varnished Cambric.

It is submitted the Newcastle Surveyors be informed
it is noted that the insulation resistance of these cables
is less than that specified in the Rules for rubber insulated
cables and in these circumstances it is desired to
know whether there were any special reasons for the use of
cables insulated with varnished cambric.

It should further be stated whether these
cables were specified by the Owners of the vessels and,
if not, whether their consent to the use of cables of this
type was obtained.
