

COPY.

16th July, 1928.

Dear Mr. Warlow,

Many thanks for your letter of the 12th instant respecting the motorship "STORSTEN".

As regards the record of SMC in this case, it is the practice in motor vessels to assign a record of SMC in instances such as this, and I am therefore adding SMC 5.28 to your minute.

I have had a note taken with a view to a modification of the entry in the Key being made next year, but you will see from the Rules that this is not only a matter of practice, as it is covered by Paragraph 5 of the Rule regarding the Periodical Survey of Internal Combustion Engines and their Auxiliaries.

I am much obliged for the information in regard to the second-hand donkey boiler.

With kindest regards,
Yours faithfully,

P.J. Warlow, Esq.,
GLASGOW.
