

Steam Trawlers "RYLSTON" and "DINAMAR".

It is proposed to lengthen these trawlers by 12'-7" and 12'-2" respectively at the fore end, and to fit new sterns to each.

The Middlesbrough Surveyors forward profile plans shewing the above alterations so that the question of the equipment may be considered.

It is submitted the Surveyors be informed that on account of the alteration to the equipment grade due to the increased length, an additional 15 fathoms of 1.2/16" stud chain cable should be supplied in each case.
