

S.S. "TREFUSIS".

This vessel was built at Sunderland in 1918 under the survey of the British Corporation to plans mutually approved by Lloyd's Register and the British Corporation for the Standard "A" type of ship.

The vessel was surveyed by the Society's Surveyors at Newcastle in October and November 1919, and on the 9th December, 1919, she was classed by the Committee 100A1.

The question has now been raised as to when the Special Survey No.1 should be reckoned to become due.

It is submitted the Newcastle Surveyors should be requested to state whether in their opinion the survey held by them in 1919 could be considered as complying with the requirements of the Special Survey No.3, in which case the Special Survey No.1 would become due in November, 1923.
