S.S. "VEERHAVEN"

EXTRACT FROM BELFAST LETTER OF 3rd JULY 1942
REGARDING ON-SURVEY.

It will be noted from that section of the report dealing with the machinery that two items arise affecting Classification, namely, the condition of the insulation of electrical circuits and the absence of a number of articles of spare gear required by the Rules. No report to the Committee has been made in this connection, but the Chief Engineer's attention was drawn to the points in question with the recommendation that the matter be put in order at the first opportunity.
