

s.s. "VOJVODA PUTNIK"

This vessel grounded on the Haisboro' Sands and is now under survey at Newcastle.

On a recent visit of Mr. Noton to this Office the alleged damages were discussed with him.

It is understood, owing to a conflict of opinion, that the Owners will probably require the Newcastle Surveyors to issue a damage report on the case.

Should such be the case, in view of the past history of the vessel, it would be well for the report to be forwarded to this Office prior to issue.
