

S. S. "VOJVODA PUTNIK".

It is submitted the Genoa Surveyors be requested to point out to the Owners' Superintendent that the re-arrangement of 'tween deck beams and plating as proposed by them, will necessitate disturbing the present pillaring at the hatchway ends in a manner in which it will be difficult to provide suitable supports *to the deck above.*

If the proposal is proceeded with, a sketch should be submitted by the Surveyors showing the same, observing that when the sketch forwarded to the Owners' London Representatives was made in this Office, the pillaring arrangements were fully gone into and the proposals were designed with the object of the minimum interference with the pillaring arrangements existing in the vessel.
